

Problem–Solution Fit

Introduction

Problem–Solution Fit ensures the proposed solution solves a real user problem. LaunchPad AI validates startup ideas before users invest time and money.

Problems

Entrepreneurs struggle with validation, market research, competitor analysis, business planning, and mentorship.

Target Users

Students, founders, innovators, incubators, freelancers.

Solution

AI analyzes startup ideas to produce validation scores, SWOT, market analysis, competitors, customer segments, revenue suggestions, and growth strategies.

Benefits

Reduces business risk, saves research time, improves decision making, and increases confidence.
